

consulting services

System Source has provided system integration services for 29 years. We manage project using a single point of contact and accountability for local and national service, for procurement, installations and support, service, internet services, training, presentation systems and rentals.

“System Source was professional, very knowledgeable and extremely thorough. And the follow-up was great!”

Joyce Homamoto, Network Specialist
Sinai Hospital

Menu of Services

Blackberry Enterprise Server - Implementation and configuration of handheld devices.

Citrix Thin Client Solutions - Pilots, proof of concepts, performance tuning and architecture.

Desktop Deployments - Specializing in deploying, migrating, assessing, testing and project management.
