

internet services

System Source provides Internet bandwidth, spam and virus control and a secure, full service hosting environment without the expense of extra infrastructure and 24x7 attention.

“System Source handles our internet needs with outstanding professionalism.”

Ed Bennett, Manager, Internet Strategy
University Of Maryland Medical Systems

Menu of Services

Let Us Manage Hosted Servers (Virtual/Physical) -

We address server, backup, bandwidth, maintenance, support and monitoring.

Let Us Maintain Hosted Servers (Virtual/Physical) -

We supplement your IT team by maintaining your server infrastructure in our data center.

Let Us Host Servers (Virtual/Physical) -

We host your servers in our data center.

Let Us Monitor IT - Watches the health and performance of computers, software and network infrastructure.

Data Protection Service - Provides secure real-time data replication to off-site locations.

Software as a Service - Exchange, SharePoint and support for other applications via remote access.

Web Site and Email Hosting - Cost effective, shared hosting.

Internet Access - Wired and wireless connections with backup options.

Spam and Virus Control - Services block spam and viruses before they reach your network.

System Source Benefits

Uninterruptible Power - Power is cleaned through UPS back-ups. Backup protection from a 100-kilowatt diesel generator protects against power failures.

Redundant Environmental Controls - 24x7 for critical systems including air conditioning and power.

Bandwidth Availability - We maintain connections to multiple upstream internet connections for high throughput and fault tolerance.

Physical Security - Two factor authentication limits access to authorized parties.

Backup and Storage - Regular backups of hosted servers with off-site storage.

Remote Access - Maintain your server remotely with complete access to files.

Uptime Guarantee - 99.9% uptime for hosted systems.

System Monitoring and Maintenance - Technicians maintain servers, routers and services.

Technical Support - Knowledgeable staff provides end-user and technical support.

Patch Management - Latest security and patches are applied to your systems under most offerings.
