

Let us manage mobile phones

Cloud phone and tablet management solution

Industry-leading technology from Cisco Meraki helps customers manage IOS/Android phones and tablets

Features:

- Centralized management via browser
- App deployment
- Security policy enforcement
- Asset management including device tracking
- Rapid provisioning
- Network integration unifies WAN and devices under cloud management

How is Mobile Device Management used?

- Customers can manage devices from a single cloud portal.
- In the event a device is lost, it can be located or remotely wiped so your organization's data is protected.

Benefits:

- Implements organizational security policies
- Lowers burden on IT help desks supporting mobile devices
- Easier provisioning of mobile devices through configuration push

Offering:

- Portal configuration recommendations
- Portal provisioning with security certificate
- Administrator training for the portal
- End-user instructions
- Security profile setup
- Fixed price of \$999* for a pilot with 2 mobile phones

**Also offered as a managed service for existing managed service clients at a fixed monthly price per device.*
